

### *My Italy (La mia Italia)*

An Italian producer and his assistant fly around Europe looking for investors to finance a movie project about the life and works of four great contemporary artists. While searching for financing, the four artists—all in love with Italy, spending many months a year in Rome—encounter incredible and ridiculous events. The Polish sculpture is contacted with an offer he cannot refuse; the Danish video-artist goes on an adventurous drive on the way to repair his unconventional installation; the American painter drives to the wreck site of a museum; and the Malaysian artist becomes entranced by an unknown beauty. This film was released in Italy in May 2017.

<b>Language</b>	Italian
